Dear Wm. P. (Tim) Wolfe III,

In March of 2005 TXU contracted with "Transportation Certification Services" to develop and present a refresher training course for our locomotive operators. The course was to cover, Basic Railroad Safety, Train Handling, Parking and Picking up cars, and D. P. operation.

The training was presented in 4 - 3 day sessions, for 4 consecutive weeks from April 18th through May 11th of 2005. Training was provided for 56 railroad personnel with experience levels ranging from 30 years to 8 weeks.

We were very pleased with the product we received. Your instructor, Marvin Spears, was very personable, knowledgeable, and professional. The feedback we received was all positive no matter what the level of experience.

We fully intend to use TCS for future refresher and training needs.

Thank you,

Stanley Long
